

S.No	Error	Reason	Solution	Example
1	#DIV/0!	Number ko 0 se divide kiya	Ensure divisor 0 na ho, IFERROR ya IF use karein	=A2/B2 (B2 = 0)
2	#VALUE!	Wrong data type (text instead of number)	Data type check karein, VALUE function use karein	=10+"ABC"
3	#REF!	Referenced cell delete ho gaya	Formula me correct reference dobara set karein	=A1 then column A delete
4	#NAME?	Function spelling galat	Function name correct karein	=SUMM(A1:A5)
5	#N/A	Lookup value nahi mila	Lookup range check karein, IFNA use karein	=VLOOKUP(105,A2:B5,2,FALSE)
6	#NUM!	Invalid numeric calculation	Valid numeric value use karein	=SQRT(-10)
7	#NULL!	Range operator galat use	Colon (:) ya comma sahi lagayein	=SUM(A1:A5 C1:C5)
8	#####	Column width chhoti ya negative date/time	Column width badhayein	Narrow column with date

S.No	Error	Reason	Solution	Example
9	#SPILL!	Dynamic array ka output block ho gaya	Spill range clear karein	=SORT(A1:A5)
10	#CALC!	Dynamic array calculation error	Formula logic check karein	=FILTER(A1:A5,A1:A5="")
11	#FIELD!	Data type field access issue	Correct field reference karein	=A1.FieldName
12	#BLOCKED!	External content blocked	Enable content karein	Linked external file
13	#CONNECT!	Data connection fail	Internet / source check karein	Power Query refresh
14	#GETTING_DATA	External data load ho raha	Wait karein ya connection check karein	Linked workbook
15	#UNKNOWN!	Unsupported / rare data issue	Formula simplify karein	Linked data type issue
